

**NOTE**

Sub:-MS - - In-Principle Approval for Procurement of Apple iMac (24", M4 Chip) for KReS, Mobile Application Development

Note #1 ARCHIE KUMAR, PLANT MS MANAGER1, 02-Dec-2025 03:51 PM

**Subject: In-Principle Approval for Procurement of Apple iMac (24", M4 Chip) for KReS, Mobile Application Development.**

Among the IT services extended by MS department to users in Plant, KReS application plays a vital role as being a platform oriented for hosting non-ERP based workloads. Presently, the platform extends services such as KHMS, Estate Management, HR Admin Forms (such as Guest House, Vehicle Request, Training Needs, Diwali Coupons, etc.). The service started as a web-based portal accessible from the intranet and now over a short time has grown to include a web portal, an android and an iOS mobile application accessible from the internet. The mobile Apps are being used extensively and so far, 700+ (530 Android & 172 iOS) devices have installed the application. Future expansion of services has been planned and are in pipeline such as Furniture/Asset Management, Marketing Bus pass, Estate Management Enhancement and Training & Development Enhancement.

The KReS application was designed, developed, and deployed vide SO# 7008432 dated 25-09-2023. The web application went live on 1st August 2024, followed by the mobile applications on 10th September 2025. Initially, the mobile app was developed and deployed using the vendor's hardware.

With effect from 1st November 2025, a new support contract (SO# 7010287) was initiated for software development and maintenance. Under this contract, only software development lies in vendor's scope while provision of hardware for development and maintenance of source code lies in KRIBHCO's scope.

The development and maintenance activities require specialized tools/Integrated development environment such as VS Code, Android Studio, Xcode, and SQLyog, which are mostly open source except Apple's Xcode. A workstation has been provisioned under the ongoing contract for carrying out development and maintenance of Web APIs and Website at MS department. Another workstation is required to carry out Mobile App development, while development for Android platform can be performed on Microsoft Windows, an Apple Mac system is essential for iOS application development and deployment.

Therefore, procurement of one **Apple iMac All-in-One Desktop** with specifications; 24-inch 4.5K Retina Display, Apple M4 Chip, 24 GB RAM, 512 GB SSD Storage; is required for the **development, maintenance, testing, and deployment of KReS iOS application and shall also be leveraged for Android mobile application**. As per platform requirements, **iOS application development and App Store deployment mandatorily require macOS-based hardware**. Additionally, the enhanced configuration (higher RAM and SSD) will support multi-environment (Android & iOS)

builds, emulators, and secure code compilation with improved performance and reliability.

The proposed iMac will facilitate:

- Timely development and rollout of features in KReS application.
- Ongoing maintenance and version updates for existing app.
- Compliance with Apple development and deployment ecosystem requirements.
- Improved productivity and faster build cycles for the development team.

## Proposal

In view of above, it is proposed to accord in principle approval for **procurement of the above Apple iMac system** . On approval, PR shall be initiated in SAP with estimated cost of Rs 1.90 Lacs, inclusive of GST, the procurement shall be funded from MS Capital Budget 2025-26 code SCP-2526-HAZ-012-01.

**Submitted for kind approval.**

Note #2 SUNIL KUMAR VA, PLANT MS HEAD, 03-Dec-2025 10:35 AM

To develop and modify the KRes App, which currently operates on both Android and iOS platforms, Apple iMac hardware is essential. Previously, these apps were developed and supported by M/s.Triveni Global Software Services. As this was a new development, they have also supplied the required development hardware during their contract period. With the completion of the aforementioned contract, a new software support contract has been awarded to M/s.Lemon Technologies Private Limited. Being software support, provision of all required hardware and source code is in the scope of KRIBHCO.

In view of above, in-principle approval may be granted for procurement of Apple iMac All-in one desktop to facilitate updates, changes, and the addition of new required features.

On approval, a PR will be initiated for this procurement through competitive bidding.
