<u>11. Store Procedure List</u>	<u>28</u>
<u>12. Views List</u>	<u>32</u>
<u>13. Trigger List</u>	<u>32</u>

1. Environment Details

- PHP Version: 8.1
- Laravel Framework: 10
- Database MySQL
- Web Server: Apache
- Text Editor: Visual Studio Code

2. Database Configuration

- Database Name: your_database_name
- Username: your_database_user
- Password: your_password
- Host: 127.0.0.1 (or other if remote)
- Port: 3306 (default for MySQL)

Configure the .env file in Laravel for database connectivity:

.env File

- DB_CONNECTION=mysql
- DB_HOST=127.0.0.1
- DB_PORT=3306
- DB_DATABASE=your_database_name
- DB_USERNAME=your_database_user
- DB_PASSWORD=your_password

3. Laravel Specific Configuration

- **Configuration Caching:** Run `php artisan config:cache` in production to cache configuration files for better performance.
- **Route Caching:** Run `php artisan route:cache` for optimized route loading.
- **Optimizing Autoloader:** Use composer install --optimize-autoloader for production.
- **View Caching:** Run `php artisan view:clear` for all view or blade files.

4. Running the Project Locally

- **Starting the Development Server:**

php artisan serve

This will start the server on `http://127.0.0.1:8000` by default

- For running specific ports use the below command

php artisan serve --host=your_ip_address --port=your_specific_port

5. Third-Party SMS integration

- <http://api.smsbrain.in/1.2/appsms/send.php>

user :- your_user_name

passwd :- your_password

senderId :- your_sender_id

6. Controller and Service Class List

Module Name	Method	URL	Model	Controller	Service Class	Function Name
Login	GET	login	App\Models\User;	App\Http\Controllers\Auth\LoginController	-	showLoginForm
Login	POST	login	App\Models\User;	App\Http\Controllers\Auth\LoginController	-	login
Reset PIN	GET	forgot-pin	App\Models\User;	App\Http\Controllers\Auth\ForgotPasswordController	-	showMobileResetForm
Reset PIN	POST	password-mobile	App\Models\User;	App\Http\Controllers\Auth\ForgotPasswordController	-	sendMobileResetLink
OTP Verification	GET	otp-verify	App\Models\User;	App\Http\Controllers\Auth\ForgotPasswordController	-	otpVerify
Reset PIN	POST	send-otp-mobile	App\Models\User;	App\Http\Controllers\Auth\ForgotPasswordController	-	sendOtp

11. Store Procedure List

Module Name	SP Name	Input parameter	Description
Patient List	sp_list_patient	page, pageSize, searchKeyword , catID , personalID , patientCODE, patientStatus , p_order_by_column, p_order_direction	stored procedure is used to fetch patient records.
Patient Allergy Audit Log	sp_list_patient_allergy_audit_logs	patientID	A stored procedure is used to fetch patient allergy audit log records.
Patient Audit Log	sp_list_patient_audit_logs	patientID	A stored procedure is used to fetch patient audit log records.
Patient Create / Edit Personal No Search	sp_list_patient_employee	searchKeyword	A stored procedure is used for employee and patient master detail fetch.
Patient High-Risk Audit Log	sp_list_patient_high_risk_audit_logs	patientID	A stored procedure is used to fetch patient high-risk audit log records.
Unique Patient Code	sp_gen_unique_patient_code	P_personal_id , pCategoryId , p_relation_id	A stored procedure is used to generate unique patient code.
Lab Test Patient Report	sp_rpt_current_day_lab_test_patient_report	P_from_date , p_to_date , p_patient_code , p_case_no , p_case_type	A stored procedure is used to fetch lab test patient detail.

Disease wise patient OPD and non-opd list	sp_rpt_disease_wise_patient_list_opd_non_opd	caseType , fromDate , toDate , fromPatientCode, toPatientCode , diseaseId , opdHours , nonOpdHours	A stored procedure is used to fetch disease-wise patient detail.
Doctor-wise OPD Patient List	sp_rpt_doctor_wise_patient_list	fromDoctorCode , toDoctorCode , fromDate, toDate	A stored procedure is used to fetch doctor-wise patient detail.
Indoor Patient List	sp_rpt_indoor_patient_list	fromDate , toDate, from_patient_code, to_patient_code	Indoor patient list fetch
OPD patient List	sp_rpt_list_opd_patient	fromDate, toDate, fromCode, toCode	OPD patient list fetch
Patient Prescription Treatment Detail	sp_rpt_prescription_indoor_treatment_patient_detail	caseno, trdate	Patient prescription treatment detail fetch
Case OPD / IPD	sp_list_cases	p_deleteStatus, p_caseType, p_caseno, p_fromdate, p_todate, p_catid, p_personalid, P_patientcode, p_doctor_id, p_casestatus, Page, pageSize, searchKeyword , p_order_by_column, p_order_direction	Fetch the case list containing records from the last 6 months.
Case Audit Log	sp_list_case_audit_logs	caseID, caseType	Case audit log list fetch
Case Diagnosis Audit Log	sp_list_case_diagnosis_audit_logs	caseID, diagnosisType	Case diagnosis audit log list fetch
Case Observation Audit Log	sp_list_case_observation_audit_logs	caseID	Case observation audit log list fetch
Case Other Procedure Audit Log	sp_list_case_other_procedure_audit_logs	caseID	Case other procedure audit log list fetch
Case Pathology Audit Log	sp_list_case_pathology_audit_logs	caseID	Case pathology audit log list fetch
Case Surgical Audit Log	sp_list_case_surgical_audit_logs	caseID	Case surgical audit log list fetch
Case Treatment Audit Log	sp_list_case_treatment_detail_audit_logs	caseID	Case treatment audit log list fetch
Case Symptom Audit Log	sp_list_symptoms_audit_logs	caseID	Case symptom audit log list fetch

Case Visit Audit Log	sp_list_case_visit_audit_logs	caseID	Case visit audit log list fetch
Case Vital Audit Log	sp_list_case_vital_audit_logs	caseID	Case vital audit log list fetch
Case Pharmacy-wise Prescription	sp_rpt_case_pharmacy_wise_prescription	pcaseNumber, pcaseType, pPharmacyId	Generate Pharmacy-wise Prescription report
Case Wise Lab Test	sp_rpt_case_wise_lab_test	testCode, labTestId	Generate case wise lab test report
Case Injection Detail	sp_rpt_injection_case_detail	fromPatientCode, toPatientCode, fromDate, toDate	Generate case injection detail report
Case Export	sp_export_cases_list	p_deleteStatus, p_caseType, p_caseno, p_fromdate, p_todate, p_catid, p_personalid, P_patientcode, p_doctor_id, p_casestatus	Generate case data export in Excel
Surgical Treatment IPD report	sp_rpt_surgical_treatment_ipd	fromDate, toDate, treatmentDate	Generate surgical treatment IPD report in PDF
Surgical Treatment OPD report	sp_rpt_surgical_treatment_opd	fromDate, toDate, treatmentDate	Generate surgical treatment OPD report in PDF
Case Medicine Issue	sp_create_case_itembatchtransdetail	p_item_id, p_qty, p_case_type, p_caseid, p_medicineld, p_created_by, p_created_term, P_batch_trans_status, p_treatmentId	When a record is inserted into the itembatchtransdetail table, the corresponding batch stock in the itembatchmst table is updated.
Death Certificate	sp_gen_death_certificate_unique_code	pCodeType	To generate a unique code for a death certificate.
Death Certificate Report	sp_rpt_death_certificate	id	Death certificate report generate
Unique code OPD / IPD/ Test	sp_gen_unique_code	pCodeType	To generate a unique code for the OPD / IPD case and Test master.
Unique code sub-test	sp_gen_unique_sub_test_code	pCodeType, p_main_test_id	Generate a unique code for the subtest master.
Charge	sp_list_charges	PAGE, pageSize, searchKeyword, p_from_date, P_to_date, p_charge_section, p_cat_id, p_relation_id, p_charge_status, p_test_code, P_order_by_column, p_order_direction	Charge list fetch

Death Certificate List	sp_list_death_certificate	p_doctor_code, p_patient_code, p_order_by_column, p_order_direction	Death Certificate list fetch
Employee List	sp_list_employee_list	login_type	Employee list fetch
Error Log List	sp_list_error_logs	projectType	Error list fetch
Item List	sp_list_items	p_item_cat_id, p_pharmacy_entity_id, p_on_hand_qty, PAGE, pageSize, searchKeyword	Item list fetch
User List	sp_list_khms_users_list	Login_type, p_personal_no, p_employee_name, p_order_by_column, p_order_direction	User list fetch
Lab Test List	sp_list_labtest_transaction	p_caseno, p_reportdate, p_patientcode, p_doctor_id, p_main_test_code, p_lab_status, p_patient_type, page, searchKeyword	Lab test list fetch
Lab Test Report	sp_rpt_lab_test	patientCode , testCode, labTestId	Generate lab test report
Sick Certificate	sp_gen_sickfit_certificate _unique_code	pCodeType	To generate a unique code for a Sick-Fit certificate.
Sick-Fit Certificate	sp_list_sick_fit_certificate	p_from_date, p_to_date, p_patient_code, p_order_by_column, p_order_direction	Sick Fit Certificate list fetch
Sick-Fit Certificate Report	sp_rpt_sick_fit_certificate	sick_id	Sick Fit Certificate report generated
Test Listing	sp_list_test	p_order_by_column, p_order_direction	Test master list fetch
Medical Expenses Employee Payroll Report	sp_rpt_general_payroll_medical_expenses	p_case_from_date, p_case_to_date , p_personal_from, p_personal_to, P_patient_code_from, p_patient_code_to, p_cat_id	Employee-wise summary report generated in Excel
Medical Expensed Detail Report	sp_rpt_medical_expenses_details	p_case_from_date, p_case_to_date , p_personal_from, p_personal_to, P_patient_code_from, p_patient_code_to, p_cat_id	Employee detail report generated in PDF
Item Stock	sp_rpt_item_wise_stock	itemCodeFrom, itemCodeTo, storeId	Generate item-wise stock report

Outside Reference Report	sp_rpt_outside_reference	fromDate, toDate, referred_by, referred_to	Generate outside reference report in PDF
Patient-wise immunization detail report	sp_rpt_patient_wise_immunisation_details	fromPatientCode, toPatientCode, fromDate, toDate	Generate patient-wise immunization detail report
Indent PDF report	sp_rpt_pdf_indent	id	Generate indent PDF report
Pharmacy Item Consumption Report	sp_rpt_pharmacy_item_consumption	p_from_date, p_to_date, p_pharmacy_id, p_case_type	Generate Pharmacy item consumption report
Prescription Indoor Treatment patient detail	sp_rpt_prescription_indoor_treatment_patient_detail	caseno, trdate	Generate report patient indoor prescription treatment detail
Reference Detail	sp_rpt_referance_detail	case_id	

12. Views List

Module Name	View Name	Description
Chargemaster	vu_charge_test_name	Test-wise list fetch

13. Triggers List

Module Name	Trigger Name	Action	Description
Patient Master	tr_after_insert_patientmst	AFTER INSERT	When a record is inserted into the patientmst table, a trigger is executed to insert a corresponding record into the patient_history table.
Patient Master	tr_after_update_patientmst	AFTER UPDATE	When a record in the patientmst table is updated, a trigger is executed to update the corresponding fields in the patient_history table.
Patient Allergy Detail	tr_after_insert_patientallergydetail	AFTER INSERT	When a record is inserted into the patientallergydetail table, a trigger is executed to insert a corresponding record into the patientallergydetail_history table.
Patient Allergy Detail	tr_after_update_patientallergydetail	AFTER UPDATE	When a record in the patientallergydetail table is updated, a trigger is executed to update the corresponding fields in the

			patientallergydetail_history table.
Patient High-Risk Detail	tr_after_insert_patienthighriskdetail	AFTER INSERT	When a record is inserted into the patienthighriskdetail table, a trigger is executed to insert a corresponding record into the patienthighriskdetail_history table.
Patient High-Risk Detail	tr_after_update_patienthighriskdetail	AFTER UPDATE	When a record in the patienthighriskdetail table is updated, a trigger is executed to update the corresponding fields in the patienthighriskdetail_history table.
Case Master OPD / IPD	tr_after_insert_casemst	AFTER INSERT	casemst_history
Case Master OPD / IPD	tr_after_update_casemst	AFTER UPDATE	casemst_history
Case Pathology	tr_after_insert_audit_casepathologydetail	AFTER INSERT	casepathologydetail_history
Case Pathology Detail	tr_after_insert_casepathologydetail	AFTER INSERT	Labtesttransdetail labtestresultdetail
Case Diagnosis Detail	tr_after_insert_casediagnosisdetail	AFTER INSERT	casediagnosisdetail_history
